SKILLS/ JOB RECOMMENDER APPLICATION

Problem Statement

Dealing with the enormous amount of recruiting information on the Internet, a job seeker always spends hours to find useful ones. Many times, people who lack industry knowledge are unclear about what exactly they need to learn in order to get a suitable job for them. We address the problem of recommending suitable jobs to people who are seeking a new job.

I am (USER)

User ahs to upload their skill details this application for recommend the job their skill based.

I am Trying To

We address the problem of recommending suitable jobs to people who are seeking a new job.

But

Dealing with the enormous amount of recruiting information on the Internet, a job seeker always spends hours to find useful ones.

Because

It is hard, and there is a delay to know about the job details.

Which makes me feel?

The objective of the web as well as android application is to provide flexibility to the jobseekers by providing the functionalities of both job search and job application in a single application.
